1. Summary of Issue

A recent MCA survey of a fishing vessel highlighted that the vessel's complement of inflatable, non-SOLAS lifejackets had not been serviced in accordance with the requirements of MGN 553: Inflatable Non-SOLAS Liferrafts and Life-Saving Appliances. The lifejackets had undergone servicing with a service provider that did not hold manufacturer's approval for that particular make and model.

2. Actions to take

Fishing vessel owners and operators are reminded that Non-SOLAS life saving appliances in commercial use are to be serviced in accordance with the requirements of MGN 553, and are encouraged to check that the service station used for servicing is approved by the manufacturer. If unsure, please contact the equipment manufacturer who will be able to suggest an approved service station.

3. Further information

Any queries should be directed to the MCA at:
