

THE REPUBLIC OF THE MARSHALL ISLANDS

OFFICE OF THE MARITIME ADMINISTRATOR

SUPPLEMENTARY REPORT TO SAFETY INSPECTION FOR LIQUEFIED GAS CARRIER

NAME OF VESSEL	OFFICIAL NUMBER	DATE

A. GENERAL CONDITION, REPAIRS SINCE LAST ANNUAL SAFETY INSPECTION

1.	Repairs or modifications to hull structure, (if yes, describe in Section J).	yes ☐ no ☐
2.	Repairs or modifications to cargo system? (If yes, describe in Section J).	yes ☐ no ☐
3.	General condition of vessel and cargo containment. (Describe general condition of vessel and cargo containment in Section J).	Excellent / Good / Poor
4.	General condition of the cargo handling and cargo safety equipment. (Describe general condition of cargo handling and cargo safety equipment in Section J).	Excellent / Good / Poor

B. CARGO OPERATIONS

1.	Cargo Operations Manual available in Cargo Control Room?	yes ☐ no ☐
2.	Is Cargo Operations Manual being followed?	yes ☐ no ☐
3.	Has cargo plant operating manual been sighted for: Re-liquefaction/refrigeration system, Gas combustion units, Re-gasification units	yes ☐ no ☐ yes ☐ no ☐ yes ☐ no ☐
4.	Gas Detector Log reviewed and is it maintained? Abnormal readings? (If yes, describe in Section J).	yes ☐ no ☐ yes ☐ no ☐
5.	Certified gas detector calibration gas available? Date and port the gas detector was last calibrated.	yes ☐ no ☐ Date: Port:
6.	Portable gas detectors (2) available? Date and port last calibrated.	yes ☐ no ☐ Date: Port:
7.	Pressure Log reviewed and is it maintained? Abnormal readings? (If yes, describe in Section J).	yes ☐ no ☐ n/a ☐ yes ☐ no ☐ n/a ☐
8.	Temperature Log reviewed and is it maintained? Abnormal readings? (If yes, describe in Section J).	yes ☐ no ☐ n/a ☐ yes ☐ no ☐ n/a ☐
9.	Cargo high liquid level alarms, overflow control and level indicators, date and port last tested.	Date: Port:
10.	Cargo tank pressure relief valves high and low pressure alarms correctly set and settings marked?	yes ☐ no ☐

B. CARGO OPERATIONS (continued)		
11.	Last test date and port for cargo tank pressure relief valves.	Date: Port:
12.	Last pressure test date and port for cargo/vapor lines and cargo relief valves	Date: Port:
13.	Safe carriage information and emergency procedures manual available in Cargo Control Room?	yes ☐ no ☐
14.	Emergency manual and automatic shutdowns of cargo pumps, filling valves and compressors, date and port last tested.	Date: Port:
15.	Protective and safety equipment provided as per IGC?	yes ☐ no ☐
16.	Basic safety precautions being taken including cargo operations, as per cargo log book and operational records?	yes ☐ no ☐
C. FIREFIGHTING SYSTEMS		
1.	Water spray system for deck house, cargo domes & manifolds tested? Date tested.	yes ☐ no ☐ Date:
2.	Fixed dry chemical for cargo area, date and port last serviced.	Date: Port:
3.	Fixed systems for gas dangerous enclosed spaces, date and port last serviced.	Date: Port:
D. INERT GAS SYSTEMS		
1.	Maintenance records reviewed and found in order?	yes ☐ no ☐
2.	Oxygen content meter and alarm tested?	yes ☐ no ☐
E. AIR LOCKS		
1.	Maintenance records reviewed and found in order?	yes ☐ no ☐
2.	Oxygen content meter and alarm tested?	yes ☐ no ☐
F. CARGO BOIL-OFF USED AS FUEL (LNG ONLY)		
1.	Inert gas monitor and alarm for gas piping in engine room tested?	yes ☐ no ☐
2.	Automatic and manual closure valves, date and port last tested.	Date: Port:
3.	Gas detection alarm and automatic shutdown, date and port last tested.	Date: Port:
G. CREW QUALIFICATIONS		
1.	STCW minimum training and endorsements for liquefied gas carriers?	yes ☐ no ☐
2.	Other liquefied gas training and/or qualifications? If yes, please describe in section J.	yes ☐ no ☐
3.	Cargo related emergency drills and exercises conducted? (If yes, provide date and description in Section J).	yes ☐ no ☐

H. COLD SPOT EXAMINATION		
1.	State date and port when the last cargo containment cold spot examination was held. When cold spots were found, report the details and location in section J	Date: Port:
I. RE-LIQUEFACTION SYSTEMS		
1.	When the ship is fitted with a re-liquefaction system, state date and port that the alarms, associated with the re-liquefaction system, duty and standby temperature, pressure, flow and gas detection sensors in the cold box, have been examined and tested	Date: Port:
J. GENERAL OBSERVATIONS AND COMMENTS		
IMPORTANT NOTICE NEITHER THE INSPECTION NOR THE REPORT CONSTITUTES A CERTIFICATION, WARRANTY OR OTHER REPRESENTATION AS TO THE SEAWORTHINESS OF THE VESSEL DESCRIBED HEREIN NOR DO THEY RELIEVE ANY PERSON OR ORGANIZATION FROM THEIR RESPECTIVE RESPONSIBILITIES AND OBLIGATIONS TO ENSURE THAT THE VESSEL IS MAINTAINED IN A SEAWORTHY CONDITION.		
INSPECTOR		MASTER (OR REPRESENTATIVE)
PRINT		PRINT
NOTICE TO MASTER: Masters are required to review all entries in the Report before signing it. It is recommended that they discuss with nautical Inspector any findings which may not agree with actual conditions prevailing on board at the time of inspection.
